***Claim Objections***

Claim 2 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. The above claims is not properly further limiting upon independent apparatus claim 1 because this claim recites only a limitation dealing with the manner of use of the claimed apparatus (the frequency of interruption of the gas supply) and it has been well settled that the manner or method of use of the claimed apparatus and cannot be relied upon to fairly further limit claims to the apparatus itself. See MPEP 2114 and 2115.

***Claim Rejections - 35 USC § 102***

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by European Patent Application 0045658 (EP'658). EP'658 teaches an arrangement in a gas supply system for a tuyere in a metallurgical furnace, as shown in the embodiment of figure 1 for example, which can be employed for a plurality of tuyeres, where the gas flow is reduced or interrupted to some extent through the use of transducers (4) thereby showing all aspects of the above claims since the use of the device for reducing the gas supply by any particular value at any particular frequency are limitations dealing with the manner or method of use of the claimed apparatus and cannot be relied upon to fairly further limit claims to the apparatus itself. See MPEP 2114 and 2115.

***Allowable Subject Matter***

Claim 7 is allowed at least because none of the cited or applied prior art shows or fairly suggest the high frequency periodic pulsing of the gas supply.

***Conclusion***

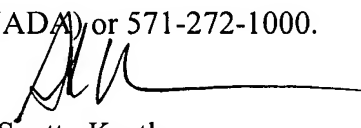

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Kuppel et al is also cited as a further example of prior art.
